## News to Enhance Self-Service and Improve Security

1st Quarter Newsletter, 2016

[www.parabit.com](http://www.parabit.com)

### From the President:

Dear Friends,

This is going to be one of Parabit's biggest and most important years yet.

After the EMV liability shift, in a world where security is more important than ever, and where mobile technology is making headline news on a daily basis, we are continuing to stay ahead of the curve. We are developing new products to make your business more secure, and to enhance the customer experience.

This spring, we will announce the launch of a revolutionary new product to enhance omni-channel digital and retail banking.

We are developing custom solutions to improve security at banks, hospitals, airports, and retail environments.

And as always, we are here to work with you at every step of the journey. I take pride in overseeing every project, from A to Z. Every product that leaves our factories and offices receives my personal stamp of approval.

I welcome you to reach out to me directly. Your feedback and unique security and self-service requirements are important to me, and to the team here at Parabit.

Warm Regards,

Rob Leiponis,  
President and CEO

### In the News:

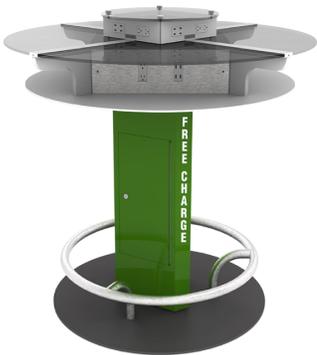

Parabit has been chosen by the **second largest bank in America to design a specialty camera enclosure to monitor teller transactions at hundreds of branches.** The bank commissioned Parabit to make 1,000 units, which are shipping via a distributor. The camera enclosure is an essential security measure for the bank, which required a camera to capture HD facial images of all transactions that take place at teller stations with bandit barriers.

The custom camera enclosure, named the **Bandit Barrier Teller Camera**, is designed to affix to most bandit barrier stations without the use of any hardware. The enclosures are made of lightweight, durable materials which are vandal resistant and will last for many years. The new enclosure is available as an edge mount or a surface mount.

# News, Tradeshows, and Products

## Featured Products:

### NEW Mobile Device Charging Table

This high-end, two-tier mobile device charging table from Parabit has vandal-resistant construction, a foot-rest for added comfort, and glass shelving. Traditional enough for a business event or a

bank lobby, but cool enough for lounges, restaurants, and trade-show booths.

### NEW Wall Mount Charging Station

Parabit made this custom wall-mounted charging station for the Metropolitan Atlanta Rapid Transit Authority (MARTA). Vandal resistant, secure charging for train station passengers that fits with the general infrastructure and décor.

## Upcoming Tradeshows:

**DIGITAL SIGNAGE EXPO, Booth 740**

Las Vegas, NV, March 15 to 17

**ISC WEST, Booth 30092**

Las Vegas, NV, April 4 to 6

**AAAE 88th Annual Expo, Booth 627**

Houston, TX, May 15 to 18

**FSPA 43rd Annual Show, Booth 215**

Orlando, FL, May 18 to 21

## In the News:

**Parabit Systems has recently completed the first phase of renovating and retrofitting new Flight Information Display (FID) screens and enclosures in Terminal 1 at JFK.** Parabit designed and installed both 3 - screen and 4-screen FIDs on a total of eight columns. Terminal One Group handles all operations at Terminal 1 in JFK. The company was tasked with replacing old Flight Information Displays (FIDs). They needed to find a **total solution** that would work seamlessly with their existing IT infrastructure, as well as the unique architecture of the terminal.

[Read the full case study](#)

Parabit provided Terminal One Group with a total solution. **The result is new FIDs with intuitive software which look so attractive, they "look like they came with the original architecture,"** says Terminal One Group's IT Director.

## In the Community:

Parabit made a generous donation to support the Greater New York Councils Boy Scouts of America Queens Aviation Luncheon. The program enables boys and girls to develop healthy habits.
